

Increasing safety through enhanced hazard visibility  
with LEDaLITE

## Hazard Visibility

The Unipart Dorman LEDaLITE is a switchable flashing/steady hazard warning lamp, used in a wide range of applications by utility companies, industrial sites, contractors, local authorities and equipment and plant hire companies.

The LEDaLITE is a bi-directional lamp that uses high efficiency LED circuitry and lens design to maximise brightness and visibility whilst optimising battery life. Switching between flash and steady and on/off is carried out using a simple key to prevent malicious operation.

- The single battery is easily replaced with no fiddly catches to operate
- Durable high intensity polypropylene body with polycarbonate bi-directional lenses which incorporate a retro-reflective ring and a polycarbonate hanging ring
- Optional cone bracket available
- Bespoke customer specified labelling available on orders over 250 lamps
- Lens colour; Amber
- Full range of spares available
- Over 95% of the Unipart Dorman LEDaLITE is suitable for end of life recycling

Increasing safety through enhanced hazard visibility  
with **EcoLITE**

## Hazard Visibility

The Unipart Dorman EcoLITE is a flashing high intensity hazard warning lamp, used in a wide range of applications by utility companies, industrial sites, contractors and local authorities for marking temporary hazards such as streetworks, skips & scaffolding.

The EcoLITE uses a bright filament bulb with a 360° lens designed to maximise brightness and visibility whilst optimising battery life. The lamp is turned on and off by rotating the lens on the body to the first stop and simply pushing and turning past the stop makes battery changing extremely simple.

- Durable high intensity polypropylene body with polycarbonate 360° lens
- Retro-reflective body decal and a hanging cord as standard (bolt fixing available)
- Optional photocell operation gives automatic switching at dusk and dawn
- Bespoke customer specified labelling available on orders over 250 lamps
- Lens colour Amber
- Full range of spares available
- Over 95% of the Unipart Dorman EcoLITE is suitable for end of life recycling
