Improving Lane Discipline & Protecting your Workforce with ConeLITE

ConeLITE

The Unipart Dorman ConeLITE is Britain's best selling roadworks lamp. Designed and manufactured in the UK, ConeLITE was the first lamp to be automatically switched on when it is dropped onto a cone to save time during deployment and the lamp is then controlled by a photocell which only lights the lamp during the hours of darkness. This automatic operation combined with efficient LED circuitry mean the ConeLITE gives excellent battery life with maximum visibility.

- The single battery is easily replaced with no fiddly catches to operate
- Durable high intensity polypropylene body with polycarbonate unidirectional lens incorporating a retro-reflective ring
- Bespoke customer specified labelling available on orders over 250 lamps
- Lens colour options available: Amber, Blue, Magenta & Red
- Full range of spares available
- Over 95% of the Unipart Dorman ConeLITE is suitable for end of life recycling
