

Performance in motion

# Fixed Train Lamps

The Unipart Dorman range of Fixed Train Lamps have been designed to be drop in replacements for existing filament lamp and reflectors.

In most cases they do not require any alterations in the electrical connection. Mechanically, the use of two different flange diameters and a range of adaptor rings allow the lamp to fit all BMAC housings, Class 47 and J Stone Enclosures.

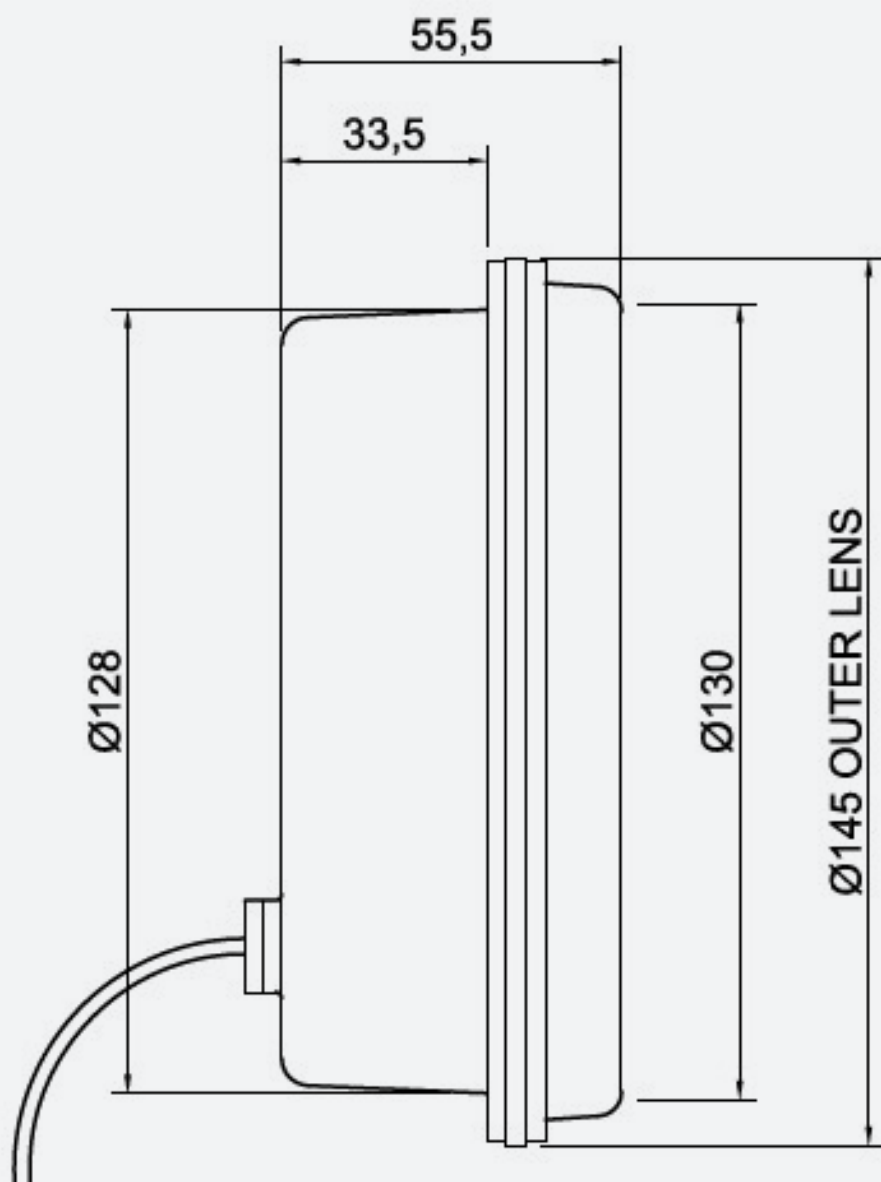

The Fixed Marker Lamp is a white lamp and the Fixed Tail Lamp is a red and both comply with the Railway Group Standard GM/RT 2131 - Audible and Visual Warning Devices fitted to new locomotives and Trains.

#### Performance Characteristics

Product Approval Certificate	24 Vdc, 74Vdc, 110Vdc
Nominal Operating Current	24 Vdc – 125mA, 74Vdc – 25mA, 110Vdc – 25mA
Electrical Connector Type	400mm of cable with either a B22d bayonet connector that fits into the existing lamp holder, an AMP Superseal connector or customer specified termination.
Ingress Protection Rating	IP 66
Operating Temperature Range	-25°C to +40°C
Light Output	100Cd on optical axis
Product Weight	1.1 Kg
