

Performance in motion

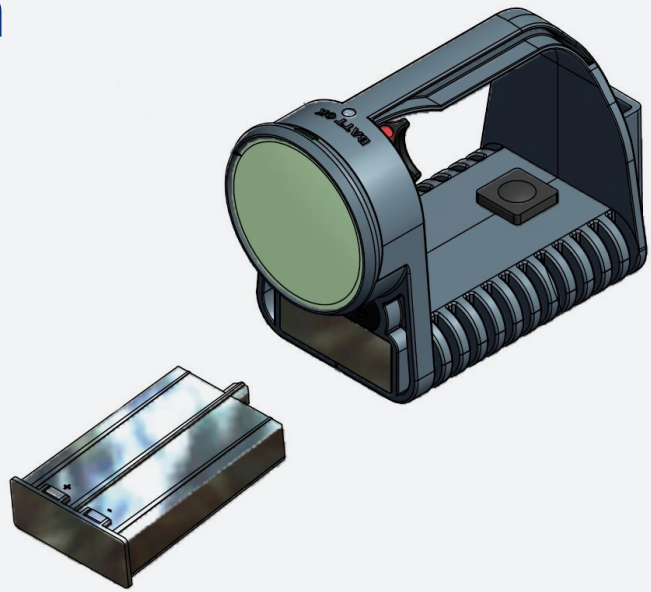

# Railway Handlamp

The Unipart Dorman Railway Handlamp was designed to replace the metal Bardic Lamp when it became obsolete.

The lamp is constructed from high impact resistant polycarbonate to withstand the most severe shocks and also reduce the weight of the lamp by 50% compared to the lamp it replaces.

The aspect on/off switch and the battery release catch are designed to be easily operated even when the operator is wearing bulky gloves. The lamps have been made more compact than the Bardic but provide the same light output by using the latest LED and lens optic design.

The Red, Yellow and Green aspects deliver true signal colours and the body of the lamp incorporates a standard lamp iron bracket to allow its use as an emergency tail lamp.

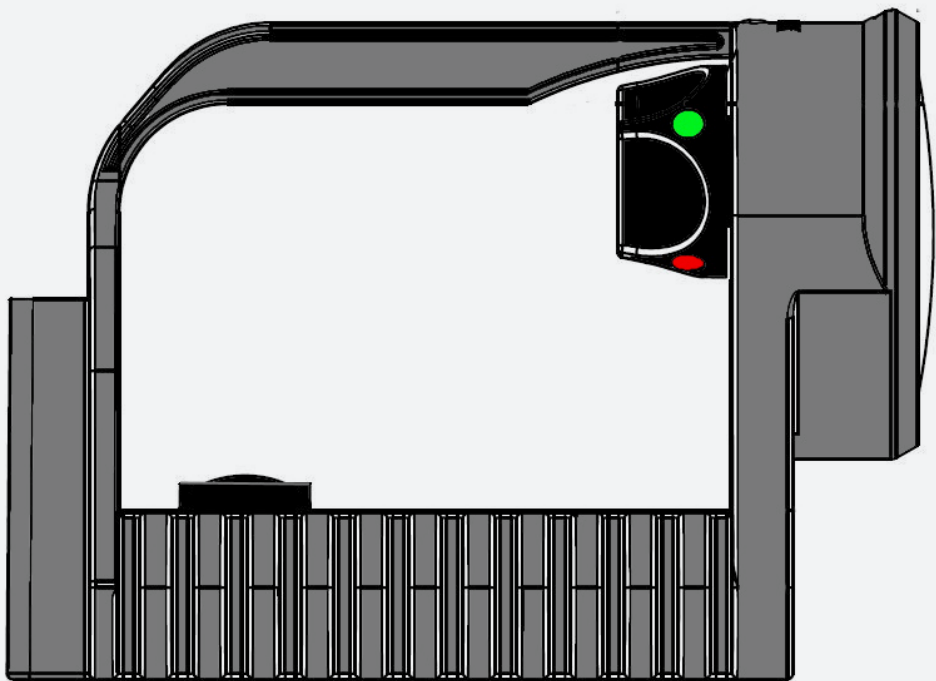

Battery life is approximately 20 hours at signal standard intensity and there is a battery condition light mounted on the top of the lamp which when lit, signifies that the battery will give at least 8 hours of compliant light (the lamp will continue to work after this but outside the signal standard's parameters).

The Network Rail Product Accepted version of the lamp uses a bespoke battery pack to deter pilferage, but a reloadable battery pack that uses 6x AA batteries is available for applications not reliant on this Product Acceptance.

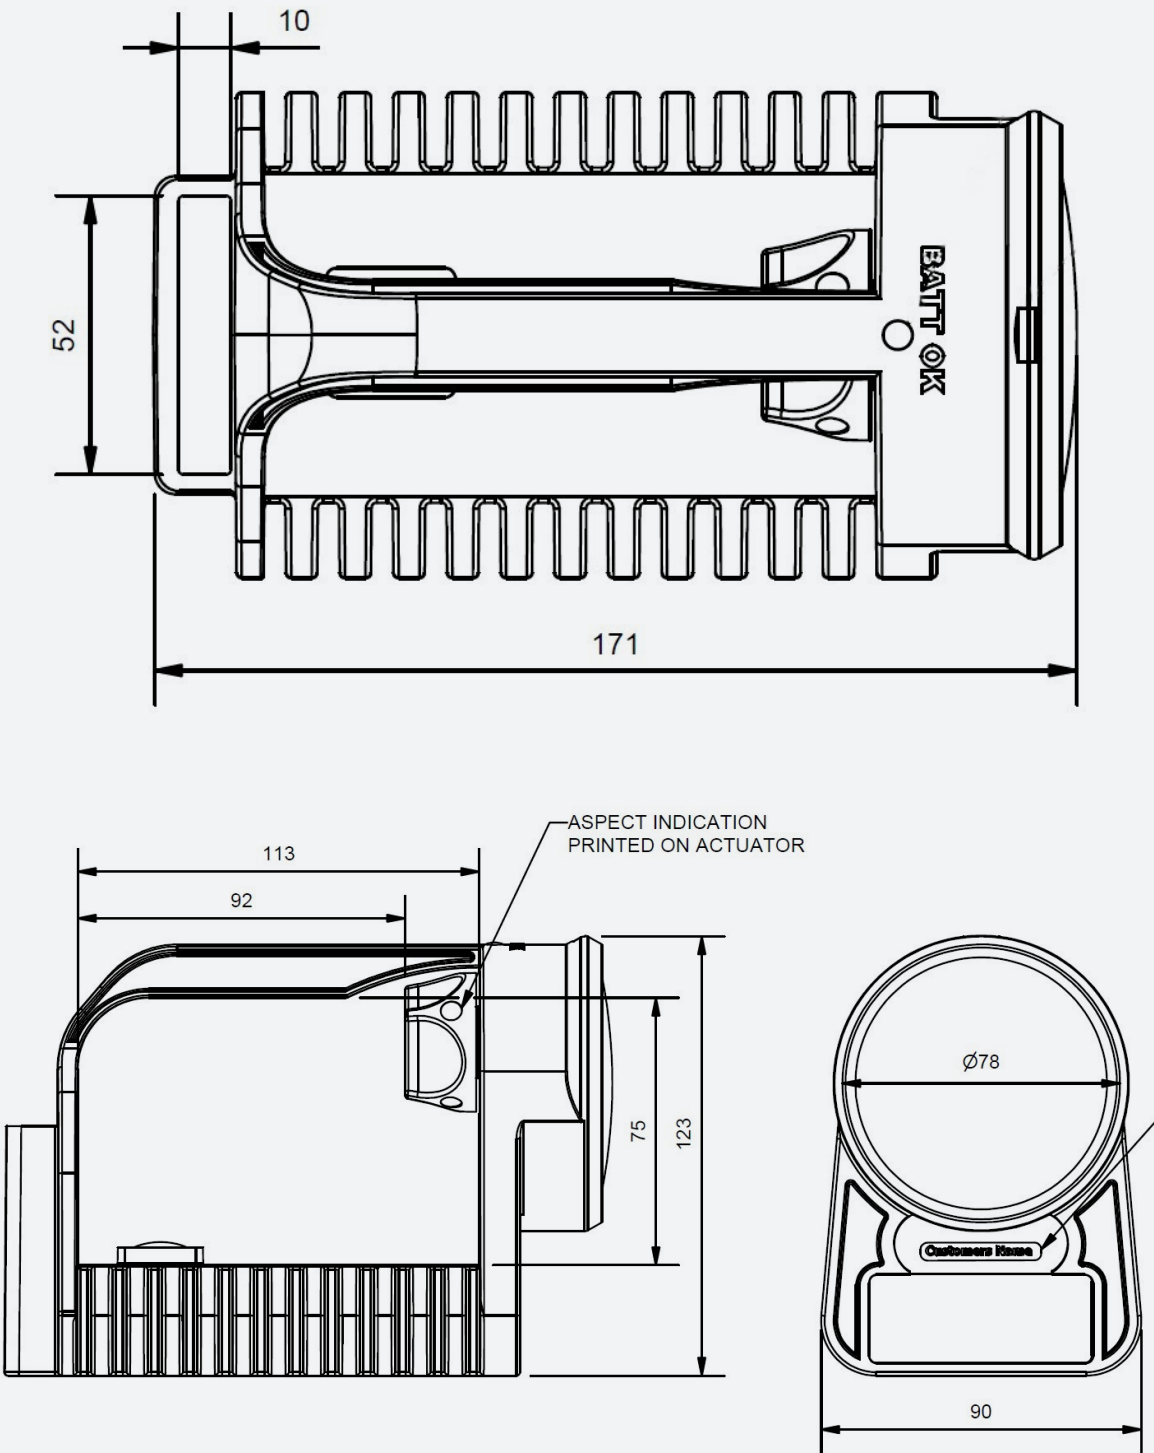

The 4 aspect Handlamp and reloadable battery pack have NATO Stock Numbers allocated for use in Defence applications.

Performance Characteristics

Product Approval Certificate	PA05/02888
Ingress Protection Rating	IP 54
Operating Temperature Range	-25°C to +40°C
Aspect Configuration	4 Aspect - Red, Yellow, Green and White 3 Aspect - Red, Green, Red and White
Product Weight	Lamp 0.38Kg, Battery Pack 0.18Kg
